

Alice visits a land full of unseen-of and unheard-of creatures – a rabbit with a clock and white gloves, a caterpillar smoking a hookah, a disappearing cat with a lingering grin and a queen who enjoys giving out death sentences if the roses in her garden happen to be white instead of red. During her time in Wonderland, Alice learns about the school under the sea and their special subject “Washing” and grows and shrinks too many times to remember. Follow her in her adventures – this classic reading, suitable for young and adult alike, will change how you look at the world!
